

## Claims

1. A backpack with umbrella support comprises:

a backpack having a front side with shoulder straps extending therefrom, said backpack having an umbrella support connected to the backpack, said umbrella support having a top with a holder thereon; and

an umbrella releasably connected to the holder, and

wherein the holder is tilted relative to the top of the umbrella support toward the front side of the backpack at an angle.

2. The backpack of Claim 1, wherein the umbrella support and a portion of the front side of the backpack are both curved surfaces configured to conform to a back of the human body.

3. The backpack of Claim 1, wherein the angle the holder tilts towards the front side of the backpack is intermediate about 5 to 20 degrees.

4. The backpack of claim 1, wherein the umbrella handle and the umbrella holder are connected by one of screwing and clamping.

5. A backpack and umbrella combination, said combination comprising:

a backpack;

an umbrella support connectable to the backpack in a first configuration, said umbrella support having at least a portion extending along an axis, said axis perpendicular to a perpendicular axis extending perpendicularly through a back of a user;

a holder located at the top of the umbrella support, said holder angled relative to the axis;  
and

an umbrella having a handle connectable to the holder of the support.

6. The combination of claim 5 wherein the backpack further comprises a slot downwardly extending into the backpack, and said umbrella support is received within the slot when installed.

7. The combination of claim 6 further comprising a cover which has an installed configuration which extends over at least a portion of the slot.

8. The combination of claim 5 wherein the holder is angled at about 5 to about 20 degrees relative to the axis.

9. The combination of claim 8 wherein the handle has a hole tapped to receive threads, and the holder has threads, said holder and said hole cooperating to connect the holder to the handle in an installed configuration.

10. The combination of claim 5 wherein the umbrella support has a curved front surface.

11. The combination of claim 5 wherein the umbrella support is connectedly secured to the backpack.

12. The combination of claim 11 wherein the connection further comprises screws.

13. A backpack and umbrella kit comprising:

a backpack having a slot extending into a top portion of the backpack and two straps extending from a front end of the backpack,

an umbrella support inserted into the slot, said umbrella support having a holder at a top of the umbrella support,

a perpendicular axis extending through the front of the backpack, an umbrella support axis extending perpendicularly to the perpendicular axis;

the holder angled relative to the umbrella support axis and having threads; and

an umbrella having a handle, said handle having a tapped hole configured to cooperate with the threads of the holder.

14. The kit of claim 13 wherein the holder is angled at 5 to 20 degrees relative to the umbrella support axis..

15. The kit of claim 13 wherein the umbrella support has a curved front side.
